NetSuite Consulting and Dev Services

Consulting on NetSuite Environment or Architecture

Minimum Hours: 2-hour session

Description: In-depth consultation on optimizing NetSuite setup, environment, or architecture for your business needs.

Developing and Deploying SuiteScript

Per Script Rate: Based on complexity (e.g., Simple: 4 hours, Complex: 10+ hours)

Description: Custom script development for NetSuite to enhance functionality, automate processes, or integrate systems.

Establishing API Connections to 3rd Parties from NetSuite

Per Connection Rate: 5-8 hours (varies based on complexity)

Description: Secure and efficient API integration between NetSuite and third-party applications or systems.

NetSuite Database Cleanup & Review

Per Database Rate: Starting at 6 hours

Description: Comprehensive database auditing, cleanup, and optimization for improved performance and accuracy.

NetSuite Operational Support

Searches, Reports, and User Training

Per Session Rate: 3-hour minimum

Description: Customized training and support for creating effective searches, generating reports, and user navigation in NetSuite.

Accounting Emergencies, Period Closing

Emergency Rate: 2-hour minimum

Description: Rapid response and support for urgent accounting issues and assistance with period-end closing procedures.

Mergers & Acquisitions

Project-Based Rate: Varies based on project scope

Description: Strategic support and integration services for NetSuite during mergers and acquisitions.

Additional Services

System Health Checks and Audits

Per Audit Rate: 4-hour minimum

Description: Regular health checks and audits to ensure optimal performance and compliance of your NetSuite environment.

Custom NetSuite Training Programs

Per Program Rate: Based on training scope (e.g., Half-Day: 4 hours, Full-Day: 8 hours)

Description: Tailored training programs designed to meet specific organizational needs in using NetSuite effectively.

Ongoing NetSuite Maintenance and Support

Monthly Retainer Option: X hours per month

Description: Continuous support and maintenance services to ensure smooth operation of your NetSuite system.

Additional Service: Project Scoping

Project Scoping and Planning

Per Engagement Rate: Starting at 8 hours (varies based on project size and complexity)

Description: A comprehensive engagement service designed to work closely with stakeholders to understand the full scope and requirements of a project. This service includes detailed discussions, requirement gathering, and analysis to create a thorough project plan. The outcome is a clear, actionable project roadmap that can be executed internally or with external contractors.

Deliverables: Detailed Project Plan, Scope Document, Estimated Timelines, Resource Requirements.

Key Features of Project Scoping Service:

Stakeholder Engagement: In-depth discussions with all key stakeholders to gather insights, expectations, and specific needs.

Requirement Analysis: Thorough analysis of the project's objectives, challenges, and requirements to ensure all aspects are covered.

Customized Project Roadmap: Development of a tailored project plan that outlines the scope, milestones, resource allocation, and timelines.

Flexibility for Execution: The project plan can be used for execution with your team or can be handed over to other contractors or internal teams for implementation.
